INTERNATIONAL SHIPPING & PAYMENT TERMS FOR L&L KILNS

PAYMENT TERMS

- The most common form of payment is Visa, MasterCard or American Express credit card or wire transfers.
- Contact us for information on how to send a wire transfer. Generally speaking, because of the fees involved for the purchaser it does not make sense to use a wire transfer for less than about \$1000

PACKAGING

- Skidded cartons or crates are included in the cost of the kiln. There is no extra charge for normal packing. Our normal packing is meets the requirements for shipment by container.

EXPORT SHIPMENTS

- We can ship parts by Federal Express, UPS, or DHL. Kilns go by various steamship companies or airlines.
- Kilns typically ship by ocean freight and get consolidated onto a container by a USA shipper.
- Air freight is also an option.
- We can get a quote on CIF charges from a freight forwarder for shipment to any country. Typically this includes inland freight from our factory to the shipping port, ocean or airfreight, insurance, paperwork charges and insurance.
- Kilns and parts typically must ship to an importing broker in your country and we will need a name and address. Any import duties and taxes must be paid in the destination country.
- To get a quote we will need to know the destination port or, in the case of airfreight, an airport. It typically takes 3 working days to get a foreign freight quote.
